Marketing Automation and Research
Part-time Internship

We are looking for a self-motivated person to join our Marketing Team based out of our office in Santiago. GroupRaise, a.k.a The most delicious way to change the world, is a rapidly growing US based start-up driven to help people raise money for what they care about just by eating at restaurants! Learn more by clicking here.

As an intern, you'll work along with the Lead Gen Team. Your main responsibility will be to handle the data mining process. This involves both executing our current strategies as well as develop new systems for innovative results. You'll have great visibility of your work’s results and you'll use that information to improve your work continuously with the help of your team.

Terms

- This is a 3 month part-time internship that could lead to a steady part or full time position
- Work hours: 20 a week
- Our office is based in Providencia, Metro Los Leones

Requirements

- Advanced level of english
- Advanced Excel - Comfortable managing big data bases
- Able to plan timelines and coordinate your work with the team’s goals
- Passionate about food and social impact
- Excellent googling skills and lots of curiosity

Bonus for those candidates with experience in:

- Web scrapers
- Python
- Visual Basic
- Data mining tools

Benefits

- Paid internship
- Flexible schedule (to be coordinated with your team)
- Opportunity for future full time employment at GroupRaise
- This is a perfect environment to learn about data management, data mining and web scrapers. You will be encouraged to develop your own systems to streamline processes.
- You will learn how to manage your time and be very results driven
- You will learn a lot about the start up environment since we work in an office shared with many other companies from different parts of the world

The person hired for this position will start in mid may. If you are interested please fill out this form. For any questions feel free to email tamy@groupraise.com
